Gerry - R.N. Splant

I don't think our charter can possibly be stretched to cover this.

Looked at from a sheer, practical viewpoint of power politics, it's 60% abstinenze rearguard and metaphysical philosophy, 40% Socialism von u zu BiOMPF.

From an atheist standpoint, a la Sartre message is excellent - that we must return to moral relationships and the dedicated, trained statesmanship which珍惜公共 trust, to decisions based on what is best and what is right, rather than what will catch the most votes.

Publication might be worthwhile just to start thinking and discussion along those lines.

But I'm afraid (a) the average citizen who reads this ~~financier~~ would never survive the first 40 pages of highly technical dogma and metaphysics, and (b) by the time the author becomes political, he's too visionary for the little man worried about tomorrow, not about the next century; (c) some of his remarks are so ~~tiny~~ as to cause disturbances ~~not only~~ in Germany, but on the higher orders of our ~~citizens~~.

RNSPEKTRUM - fragment:

p. 37, line 4: "Christenmenschen?" oder "Gottgläubige?"  
It's not yet bigoted. P. 37 - last sentence:  
"Es geht für das überland nur die christliche  
Demokratie" — This whole passage should be  
rewritten to start it off in Christ - Allah -  
Buddha - etc. Perhaps unconsciously, author is  
use of the word "Christian" borders too much  
on bigotry.

p. 40a - "... eine Obrigkeit... muss sich aus einer  
Übersicht schützen." — for what kind of  
a democracy does the governing authority  
recruit itself? Sounds like oligarchy or  
aristocracy — Bluntly: snobbery — & up.  
And on p. 63 it becomes theocratic aristocracy.

p. 41a "Ein jeder sieht ein, dass es absurd  
wäre, .... wenn in einem Industriestadtteil  
der ganze Herrschertum zu schaffen hat,  
den Produktionsplan selbstbestimmen  
würde." Large portions of German public  
disagree with our author.

"Auswahl zur Elite" (at age 12?)

Down with city left.

The congregation must be the basic  
unit of the social contract.

p. 53 - "Parteien sind keine Verbindungen der  
Demokratie" — Ha, what the man said!

strength to fight a battle of some duration  
in favorable terrain against a company? a platoon? an unorganized  
inf. Bn?) and today it may total 10 thousand,  
but the situation is such that  
it works mainly as raiding, but now even  
commandos of (25-50 men,?) many of  
whom during the day — the weekdays —  
the school year — appear to be peaceloving  
Soviet comrades and only take to the  
woods at night weekends or holidays  
for a little disruptive raiding & looting.

The present status and the potentialities  
need to be brought into much sharper,  
factual, detailed focus.

And the conclusion, of course, should  
stress again that if brave men can do so  
much deep in the heartland of Communism,  
how much more can be done by those who  
can still look for ultimate aid, supply, or  
support from a neighboring West!

Proud Patriot showed he happy to distribute  
this.

Jerry Post for £200 & thousand thanks. I suggest we  
be unfitted; we work to make this study as a case history  
of resistance against dictatorships, the problems encountered,  
the mistakes which can be made, and the problems  
with which the dictator's security forces are thereby  
confronted, and the measures they are likely to  
use.

The reader may note that, even after the Russians  
have had some 35 years to develop their policies  
still even after the Bolsheviks have been  
granted the complete education and control of  
more than a generation, resistance is not only  
theoretically still possible but actually still  
exists in spite of the political and the para-military  
level. The reader should also note, however,  
or recall from his experience in the  
General-Government — that it is only  
the veteran, alert, painstaking ~~and~~  
resistance worker who is long aware of  
success while the amateur, who may  
have had a fine, reasonably, not only a  
history himself reasonably, but colleagues  
who entire national structures of resistance  
~~fail~~ and just as the Germans appear to  
make a virtue of blunting — and discarding —  
their mistakes & may the latter part of  
this factual document serve as a warning  
and an instruction to those who would  
say many observations be rated history  
whereas the word of history was true.

of revolution - ignorant instigators, no previous experience  
with which the dictator's security forces are thereby  
confronted, and the measures they are likely to  
use.

The writer may note that even after the coup d'etat  
has had some 15 years to develop, their policy  
still remains the same. No scholars have been  
printed, the complete education and control  
more than a generation, resistance is not only  
theoretically strong, however, but actually skill  
exists in both the political and the para-military  
levee. The reader is invited to recall his experience in the  
General Government - such is only  
the veteran, alert, ~~and~~ ~~lascivious~~ ~~and~~  
resilience work he has undergone  
increases while the dictator will be un-  
successful at first, unwilling to risk ones - a  
lesson himself recently, but unwilling  
to be entirely ~~reduced~~, ~~stricken~~ to resilience.  
~~This~~ And just as the ~~unusually~~ appear to  
make a virtue of ~~slumber~~ and ~~ignorance~~  
their mistakes & may the little part of  
this factor obviously serve as a warning  
and an instruction to those who know  
why may undermine the ~~dictator~~ ~~dictator~~  
wherever the word ~~dictator~~ ~~dictator~~ was used.

I take it this is not complete. I hope it  
will also include a note that - (which revolution  
now sometimes give the impression the ~~partisan~~  
told ~~first~~ ~~political~~ ~~callies~~ with ~~Mr W~~ ~~W~~ ~~W~~  
- its beginning from the UPD might make more
